

Japan-Greece International Workshop for Young Researchers

on “Advanced Materials and Technologies for Applications
to Steel and Composite Steel / Concrete Structures”

December 7-8, 2017
Disaster Prevention Research Institute
Kyoto University, Kyoto, Japan

Background

The workshop on “Advanced materials and Technologies for applications to steel and composite steel / concrete structures” is organized by the Disaster Prevention Research Institute (DPRI), Division of Earthquake Hazards, Kyoto University in the framework of International collaboration of young researchers. It is along the lines of previous one on Earthquake Structural engineering aiming at presenting new innovative concepts, ideas and knowledge for the advancement of science and technology in the field.

The main goals are to :

- Offer the opportunity to engage in opinion exchange graduate students, young faculty members and professionals
- Strengthen the international and interdisciplinary network between earthquake engineering related communities
- Educate next-generation leaders in the area of earthquake engineering
- Promote international collaborations between DPRI and other world leading research institutions

At a Glance

December 7 (THU): Workshop
December 8 (FRI): Technical Visit

Important Dates

Deadline for paper submission: **October 20, 2017**

Please send the paper to:
wada.takuya.78u@st.kyoto-u.ac.jp

Invited Speakers

A. Athanasiou	: University of Catania Italy
A. Chaliasou	: University of Bath United Kingdom
G. Hatzigeorgiou	: Hellenic Open University Greece
G. Kamaris	: Liverpool John Moores University United Kingdom
G. Papagiannopoulos	: University of Patras Greece
D. Serras	: Hellenic Open University Greece
E. Tzoura	: University of Bath United Kingdom

Conference Co-Chairs

Dr. K. Skalomenos :
skalomenos.konstantinos.7z@kyoto-u.ac.jp
Prof. M. Kurata :
kurata.masahiro.5c@kyoto-u.ac.jp
Mr. T. Wada :
wada.takuya.78u@st.kyoto-u.ac.jp
Mr. Y. Sasaki :
sasaki.yuga.73n@st.kyoto-u.ac.jp
